

Noan Randon

📍 Aubière, France @ noanrandon@hotmail.com ☎ +33 (0) 6 036 802 40 in noan-randon 🚀 Noan07

Junior Computer Scientist, passionate about technology and currently in the second year of my Computer Science engineering Master's degree. My goal is to develop advanced skills to become a Project Manager. Rigorous, curious, and highly motivated, I am looking for a 9 to 12 week position as a Full Stack Developer intern.

EDUCATION

MEng in Computer Science

Diplôme d'ingénieur en Informatique

📅 2024 – Present 📍 Clermont Auvergne, France

- Graduate College of Engineering in Computer Science (currently 2nd year of a 3-year program).
- Certified by the CyberEdu Label, which recognizes programs providing foundations in cybersecurity.
- Relevant modules: Mathematics, Graph Theory, Algorithms, Object-Oriented Programming, Databases, Cybersecurity, Networks.

Bachelor's Degree with Specialization in Computer Science

BUT Informatique

📅 August 2024 📍 IUT UCA, France

- An undergraduate vocational degree with Mobile Development Major.
- Relevant modules: Web Development, Databases, Software Engineering, Object-Oriented Programming, Mobile Development, Networking, Project Management.

EXPERIENCE

Computer Science Sandwich Course

📍 Harvest Group, France

📅 Sep 2024 – Present **Master's Engineering apprenticeship**

- Developed a web application to advise clients on wealth management.
- Built standardized Docker images (PHP/Symfony) with GitLab CI/CD, cutting build time from 45 min to 5 min. Fixed critical production bugs and improved API security with HashIds.
- Tech stack: Angular (Front-end), Symfony (API), MariaDB (Database), Docker, GitLab CI/CD, Redis, Elastic Search, ArgoCD.

📅 Sep 2023 – Aug 2024 **Bachelor's apprenticeship**

- Played an active role in improving the administration interface of the application, implemented connection/ consultation logging with cron jobs in Symfony, set up GitLab CI/CD for automatic deployment of an npm library on Verdaccio, and handled production bug fixes.
- Renewed for a 3-year apprenticeship as part of the engineering degree.

Development Assistant

📅 Jul 2023 – Aug 2023 📍 ADLIR Conseils, France

- Verified client files using Excel spreadsheets, with automation scripts in Python.
- Built a web application to centralize client information using Next.js.

SKILLS

IT skills

Tools GitLab Git Docker ArgoCD Rancher Kubernetes

Database PostgreSQL MariaDB MongoDB Redis

Dev Angular Symfony React Native PHP Python C++

PROJECTS

WorkDeck

📅 June 2025 – Ongoing Personal Project

- Modular 3D device to track daily work activities (8 modules: water counter, presence tracker, coffee break, etc.).
- Companion mobile app connects via NFC/Bluetooth to visualize data and manage groups.

Lyros

📅 Sep 2024 – Jun 2025 School Project

- Music recognition app inspired by Shazam. Implemented audio fingerprinting based on Shazam's patented algorithm. Built with React Native, MariaDB and Python for the backend.

Blog

📅 Sep 2025 Personal Project

- Created a blog with Astro to share my passion for IT.

Algoboto

📅 Sep 2023 – Jun 2024 School Project

- Cross-platform app in .NET MAUI teaching children programming by controlling Lego robots with block-based commands (Scratch-like).
- Developed in Agile Scrum, tested in elementary schools.

HOBBIES AND INTEREST

Basketball – 10 years, departmental level.

Reading and Programming – strong personal interest, currently practicing speed reading.

Learning new skills – through platforms like Udemy and YouTube.
